

QUALITY OF AIR

A GUARANTEED INVESTMENT
FOR THE HEALTH OF
YOUR BIRDS

Investing in the health of your birds

The breeding of birds is a common passion, either for competitions, for its exotic sounds or just for the beauty of the animals. To breed a healthy bird intensive and constant care is required. Respiratory acariasis, feather scabies, asthma, aspergillosis, bronchitis, tracheitis, peak and feet, the mortality of neonates, hoarseness, among

others, are quite common in bird housings. Treatments for such illnesses generate high expenditures, concern for the owners, and stress to the birds. Airfree is the air sterilizer that destroys 99.99% of airborne microorganisms such as: fungus, bacteria, viruses, mold, and organic allergens, increasing birds' health by preventing the sprouting and bird cross contamination of illnesses. Airfree's world-wide recognized patented TSS technology has an extraordinary, and proven efficiency which is duly certified by international well known laboratories.

- Prevention of respiratory allergies in birds
- Prevention of fungus related illnesses like the aspergillosis
- Reduction on neonate mortality
- Reduction of common housing organic odors
- Harmless TSS technology no side effects, no ozone

- Capacity: up to 24m² (60m³)
- Electric consumption: 48W
- Dimensions: 34 cm height x 13 cm diam
- Warranty: 2 years
- Maintenance free
- Maintenance free. Totally silent
